

ReCoMER leads every fusion rule on accuracy and calibration, and exceeds the same-protocol reproduced baselines on every class; its WF1 gap to the fixed expert (−0.60 pp) is within seed noise.

Frozen M3ED formal test · 4,201 samples · mean ± SD over 3 paired seeds (cRBEF/TAV/AV fixed checkpoints; bold outline = ReCoMER; baselines: 3 seeds on identical features and split)
